Clinical psychologist with expertise in PTSD, assessment, and psychological / neuropsychological testing. 15 years of experience conducting comprehensive evaluations across clinical, medical, and forensic settings. Licensed in Massachusetts, Rhode Island, and all PsyPact states, with extensive expertise in neuropsychological and psychological testing. I have completed hundreds (likely over a thousand neuropsychological reports), and provide 2-3 comprehensive testing batteries and reports a week.

I am faculty and Associate Training Director at Tufts University School of Medicine, where I teach and supervise psychology trainees and psychiatry residents in psychological and neuropsychological assessment, time limited psychotherapy, and clinical hypnosis. Trained at multiple VA Medical Centers and attended weekly clinical meetings at the National Center for PTSD, developing strong expertise in trauma-related disorders. Received 3 years of neuropsychological training and direct supervision prior to licensure. My practice incorporates advanced training in clinical and medical hypnosis, time limited psychotherapy and comprehensive assessments. I evaluate complex presentations including traumatic brain injury, neurocognitive disorders, Autism Spectrum Disorder, chronic pain, somatic symptom and functional neurological disorders, ADHD, and functional cognitive impairment. I conduct disability evaluations, personal injury assessments, and consultations regarding medical necessity for neuropsychological testing.

I have been retained as an expert witness in civil cases for both the plaintiff and defendant. These cases have involved rebuttals to neuropsychological testing interpretation, causation and nexus analysis of PTSD and other diagnoses, review of neuropsychological records, medical malpractice, IME's (hundreds completed), undue influence, and personal injury. I have provided hundreds of IMO's for combat veterans and administer multiple compensation and pension exams for veteran's weekly.

Work Experience

Clinical Psychologist, Faculty, Co-Director of Neuropsychological Testing Seminar *Tufts Medical Center & Tufts University School of Medicine – Boston, MA May 2021 – Present*

- Provide neuropsychological testing for differential diagnosis (TBI, ADHD, ASD, Neurocognitive Disorders) and treatment planning.
